### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Kischkel et al, US 2002/0151454, discloses a composition for washing laundry comprising 5% by weight of sodium dodecylbenzene sulfonate, 5% by weight of guar hydroxypropyl trimethylammonium chloride, 5% by weight of Sokalan CP5 (i.e. an acrylate/maleate copolymer), 0.5% by weight of polyvinylpyrrolidone, 25% by weight of sodium tripolyphosphate, and adjunct ingredients (see Table 1 and Examples 1-12). It is further taught by Kischkel et al that the laundry detergent compositions contain 10-60% by weight of phosphates (see page 3, paragraph [0040]). However, patentee differs from applicant in that Kischkel et al requires 10-60% by weight of phosphates, whereas the instant claims require less than 10% by weight of phosphates. Furthermore, the examiner notes that the Examples in Table 1 of Kischkel et al discloses detergent compositions that contain 25% by weight of phosphates, which teaches away from the requirement of less than 10% by weight of phosphates required in the instant invention.

Accordingly, the claims viewed as a whole would not have been obvious to one of ordinary skill in the art at the time of the invention after viewing the prior art of record.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
